

13. JOINT USER SERVICE

13.1 General Regulations

Joint User Service is limited to existing customers and will not be offered to new customers. Joint User Service will be terminated after a transition of five (5) years from December 31, 1986.

Joint User Service is an arrangement whereby a person or firm - designated a Joint User - is permitted to use the service of a customer. To facilitate this use, a directory listing is provided for each Joint User.

Joint User Service is provided only in connection with individual line business service and private branch exchange service.

The Joint User must be located in the same office or suite of offices as the customer, or in an office immediately adjacent thereto and connected therewith by passageways other than public passageways.

Joint User Service is not furnished in association with the service of a customer who is engaged primarily in performing service of a secretarial nature or who is in the business of renting space to transient or permanent tenants.

No separate ring numbers or distinctive designations are assigned for the purpose of signaling Joint Users.

Joint User Service must be contracted for by the original customer who is required to assume responsibility for all charges incurred by the Joint User.

The connection of additional access lines of any type will require reclassification from Joint User Service to another appropriate classification of service. Additional central office controlled features, i.e., touch tone or custom calling services, will not be permitted to be added.

Charges for Joint User Service date from the day the traffic information records are posted - such information at the option of the customer being posted at the time the order is completed or when the listing is published in the directory. The Joint User Service is automatically discontinued upon termination of the main service.

14. VACATION RATE

Upon request, a subscriber may temporarily suspend his service for a period of one month or more. No outward or inward service is provided during the period of suspension. Only one period of suspension, not to exceed three (3) months is allowed in any calendar year.

Suspension of service may begin on any day of the month, provided reasonable notice is given in advance. Notice to restore service must also be given in advance, and the restoration of service charge following suspension will apply.

The reduction in rate for the period of suspension is equal to fifty per cent of the total exchange service charges.

15. DATAPATH SERVICE

(T)

15.1.1 General

(N)

- a. Datapath Service is a central office based communications service for the transmission of digital signals, using only digital transmission facilities. Datapath Service provides asynchronous data access at speeds from 300 bps through 19.2 kbps and synchronous data access at speeds from 1200 bps through 64 kbps.
- b. Datapath Service permits direct dialing between lines connected to the service and the direct dialing of outgoing calls. Incoming calls are received through direct dialing into the Datapath Service access lines.
- c. Datapath Service is not provided for the transmission of voice communications. Use of the service is limited to the transmission of data through digital signals.

15.1.2 Regulations

- a. Datapath Service is provided subject to the availability of properly equipped digital central offices and facilities. The normal serving area is defined by the technical limitations of each specific serving arrangement which the Company judges to be capable of data transmission without excessive degradation. Customers who are served by central offices other than the one from which Datapath is offered may receive service through the Datapath Remote Access option. Rates apply as per Section 15.1.3 of this tariff.
- b. The Company shall not be responsible if changes in any of its equipment, operations, or procedures utilized in the provision of Datapath Service render any facilities provided by a customer obsolete or require modification or alteration of such equipment or system or otherwise affect its use or performance. In such instance and when known in advance, the Company will notify customers of such changes.
- c. Charges for Datapath Service do not include equipment or other facilities which may be required at the customer premise and which must be compatible with company facilities.
- d. Service is available on a month-to-month basis. In addition 36 and 60 month contracts are available. Datapath Service is subject to all general regulations applicable to the provision of service by the Company as stated elsewhere in the tariff.
- e. Datapath Service is offered on a touch-calling basis only.

President - ALLTEL Kentucky, Inc.
Shepherdsville, KY 40165

ISSUED BY THE AUTHORITY OF P.S.C.

Order No.:

Date of Order:

15. DATAPATH SERVICE

15.1.2 Regulations (Cont'd)

- f. Suspension of service is not allowed.
- g. Regulations for Allowance for Interruption apply only as specified elsewhere in this tariff.
- h. When a data connection is inactive for thirty (30) minutes, the network will automatically disconnect the data call. Should uninterrupted service be required the customer can subscribe to the Uninterrupted Service Feature. Rates apply as per Section 15.1.3 of this tariff.
- i. Features

The following features can be used with Datapath Service :

 - 1) Automatic Line - Automatically dials a customer's pre-programmed telephone number.
 - 2) Last number redial - allows a user to redial the last number called by use of an access code rather than by dialing the entire number.
 - 3) Memory Dialing - allows a user to dial up to ten (10) frequently dialed numbers through the use of an abbreviated access code.
 - 4) Ring again - automatically redials a busy telephone number.
 - 5) Hunting - directs incoming calls to an available hunt group number.
- j. Certain features in paragraph i above may be incompatible with each other. For ALLTEL Digital Centrex customers rates and conditions for the provision of similar or equivalent custom features where offered apply as specified in Section 12. For all other customers rates and conditions for the provision of similar or equivalent custom features where offered apply as specified in Section 30.
- k. When Modem Pooling is required to provide access to the analog public switched network the rates as specified in Section 15.3 apply. Modem Pooling may be provided on either a dedicated or shared basis. Limitations on transmission speed may apply.

| 1) | Uninterrupted Service Feature | |

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

NOV 20 1995

PURSUANT TO 807 KAR 5011,
SECTION 9 (1)

BY Phyllis Lannin
DIRECTOR, RATES & RESEARCH DIV.

A data connection is normally terminated after thirty (30) minutes of inactivity. A customer may subscribe to the Uninterrupted Service Feature to avoid this data connection termination, subject to technical limitations. Service will not be disconnected due to any period of inactivity.

- | | | |
|----|------------------------|--------------------------------|
| a) | per line | <u>Monthly Rate</u>
\$10.00 |
| 2) | Datapath Remote Access | |

Datapath Remote Access refers to the facilities and equipment necessary to extend Datapath Service to certain customers who are served by central offices other than a Datapath serving office, but are within a Datapath serving area. Datapath Remote Access is offered on a special assembly basis. This charge will be in addition to the charges that are found in this section.

e. Installation Charges

- 1) The appropriate business service connection charges apply as per Section 27 of this Tariff.
- 2) A data termination charge of \$50.00 for the first line and \$10.00 for each additional line applies in addition to the service connection charges.

First Line data termination charge	\$50.00
Additional line termination charge	\$10.00
- 3) If special or unusual line conditioning is required or unusual installations occur, special assembly charges may apply.

ISSUED: October 20, 1995

EFFECTIVE: November 20, 1995

ISSUED BY:

Shepherdsville, KY 40165

ISSUED BY THE AUTHORITY OF P.S.C.
Order No.:
Date of Order:

15. DATAPATH SERVICE

15.1.4 Term Payment Plan

- a. The Term Payment Plan includes specific contract periods of 36 or 60 month in duration and is offered to all Datapath customers.
- b. The monthly rate for Datapath service under the term payment plan for the periods of 36 or 60 months is not subject to Company initiated rate increases.
- c. Datapath line additions under the term payment plan may be made at contracted rates for the duration of the contract period.
- d. Upon expiration of the term payment plan, the customer must select a new contract period as offered in the current tariff or revert to current tariff rates for the month to month payment options.
- e. Termination Liability

- 1) If service is terminated in whole or in part, except as otherwise provided herein, prior to the expiration of the agreed to term payment plan, the customer shall be required to pay a termination charge determined by the application of the following formula for Datapath lines:

Number of Disconnected Datapath Lines Below the Level Under Contract	X	Monthly Datapath Rates	X	Number of Months Remaining In the Contract Period
---	---	------------------------------	---	--

In the preceding calculation consideration will be given for the time value of money at a discount rate of ten (10) percent.

Order No.:
Date of Order:

16. DIGITAL DATA COMMUNICATION SERVICE

(T)(N)

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.1 General

- a. Advanced Digital Services (ADS) are a public network-based set of communications services that make it possible to send, receive, and modify information using regular telephone lines. These services are based on NI-1, the first set of the National Integrated Services Digital Network (ISDN) standards. ISDN provides end-to-end digital communications and gives the ability to transmit data and voice over the same telephone line simultaneously (a user can send information from a personal computer and talk to the person on the other end of the line at the same time). This functionality is provided via channelized transport facilities. The ISDN architecture consists of digital central office switching systems which connect Basic Rate Access (BRA) equipped lines to customers' premises.
- b. ADS BRA is an optional service arrangement that requires an access line and can be used in conjunction with a customer's residential service, individual business line or Centrex service. It uses the ISDN architecture to provide the customer with the capability to transmit voice and data simultaneously over the same digital line. Under various optional arrangements, BRA provides the customer with access to Circuit-Switched Voice Services, Circuit-Switched Data Services, and Packet-Switched Data Services.
- c. An ADS BRA arrangement obtains its capabilities from an ISDN-capable, Telephone Company central office switch. The BRA ISDN arrangement provides two communications channels (but using only one physical line) between a telephone (or computer, fax machine or other equipment) and the digital central office. These channels are called Bearer, or B Channels. Another channel, called the Delta or D Channel, is used for signaling purposes and in some applications can be used for low speed packet data communications. The complete BRA ISDN line is known as 2B+D.
 1. **B Channel** - The B Channel is a bi-directional synchronous channel capable of supporting digital transmission speeds of up to 64 kilobits per second (kbps). Some serving central offices may be limited to speeds of 56 kbps. ISDN interconnection to or through non-ISDN equipped central offices will be sub-rated to 56 kbps per channel. Each B Channel may be configured in one of the following ways:
 - (a) **Circuit-Switched Voice** - Allows the user to originate and receive only voice calls over a single circuit-switched B Channel.
 - (b) **Circuit-Switched Data** - Allows the user to originate and receive only data calls over a single circuit-switched B Channel.
 - (c) **Alternate Circuit-Switched Voice/Data** - Allows the user to originate and receive either voice calls or data calls over a single circuit-switched B Channel, but not simultaneously.
 - (d) **B Channel Packet-Switched Data Service (where available)** - Allows the user to originate and receive X.25 packet data calls on the B Channel.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

APR 01 1996

PURSUANT TO 807 KAR 5011

FOR THE PUBLIC SERVICE COMMISSION

ISSUED: March 1, 1996

EFFECTIVE: April 1, 1996

ISSUED BY: President - ALLTEL Kentucky, Inc.
Shepherdsville, KY 40165ISSUED BY AUTHORITY OF P.S.C.
ORDER NO:
DATE OF ORDER:

(N)

16. DIGITAL DATA COMMUNICATION SERVICE

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.1 General (Continued)

2. D Channel - The D Channel is a 16 kbps digital signaling channel that carries signaling and control for the B Channels. The D Channel may be optionally used to transmit X.25 packet data (where available) at a maximum transmission throughput of 9.6 kbps.
- d. All ADS consist of central office facilities (including certain outside plant facilities) extended from the Telephone Company's switching equipment to the customer's demarcation point.
- e. Distance Extension Charges, as set forth in Section 16.1.6 of this tariff, will apply to customers who are within the serving central office and who are served at a transmission range where unusual expenditures are required to make the service available.
- f. Directory Numbers
 1. Primary Directory Number - Each B Channel includes a single primary telephone directory number. On a given 2B+D Advanced Digital Services line, calls are routed to the appropriate terminal device (voice telephone, computer/data terminal or packet device) based on the type of call (voice, data or packet) presented to the Advanced Digital Services line.
 2. Secondary Directory Numbers - ADS may have additional telephone directory numbers. The additional telephone number(s) may originate or receive calls independent of the user's Primary Directory Number; however, each B Channel is allowed only one simultaneous circuit connection at a time.

16.1.2 CIRCUIT SWITCHING SERVICE DESCRIPTIONS

Circuit Switching is a switching arrangement in which an entire circuit or, in a digital switch equipped for ISDN, a specific selection of channels is dedicated to a given call. Circuit-Switched Service provides the ability to originate and receive circuit-switched voice and/or data calls over a 56/64 kbps B Channel. The customer may choose among the following Circuit-Switched features based upon application needs:

- a. Clear Channel Capability - A characteristic of the transmission paths on the B Channels that allows the full bandwidth of 64 kbps to be available to the customer. It is also possible to bridge two B Channels together to achieve data transmission speeds of up to 128 kbps. However, ISDN interconnection to or through non-ISDN equipped central offices will be potentially sub-rated to 56 kbps per channel.

- b. Additional Call Offering - This feature allows the user to be notified of an additional call when the telephone set is busy. Multiple incoming calls to a directory number or secondary telephone number (if purchased) can be terminated to the telephone.
- c. Multiline Hunt Service - This feature allows incoming calls to a busy directory number to search through a predetermined list of directory numbers. This may be another ADS directory number on the same (or a different) B Channel or (for voice calls) an analog line. The hunting arrangement may be linear or circular.
- d. Call Pick-Up - This feature allows the user to answer calls directed to other stations.
- e. Custom Calling Services - Applicable Custom Calling Services (except for those superseded by Advanced Digital Services counterparts) are available at rates and charges specified in the Custom Calling Services section of the Company's tariff. The following Custom Calling features found specifically in this BRA tariff will be charged at rates listed in Section 16.1.6 of this tariff:
 - 1. Call Hold - This feature allows the user to place a call on hold.
 - 2. Three-Way Calling - This feature allows the user to add a third party to an existing voice call and thus enables a conference between parties at multiple locations. The user may also disconnect the last party added. The Additional Call Offering feature or Additional Call Appearances feature is a prerequisite.
 - 3. Call Transfer - This feature allows the user to transfer a voice call to another directory number. The Additional Call Offering feature or Additional Call Appearances feature is a prerequisite.
 - 4. Conference Calling - Six-Way Station Controlled - This feature allows the user to set up a conference call for up to 6 parties (including the originator of the call). The Additional Call Offering feature or Additional Call Appearances feature is a prerequisite.
 - 5. Call Forwarding - This feature allows calls to be redirected from one station to another station.

16. DIGITAL DATA COMMUNICATION SERVICE

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.2 CIRCUIT SWITCHING SERVICE DESCRIPTIONS (Continued)

- f. Custom Calling Services - Custom Calling Service and ALLST*R Services are available at rates and charges specified in Section 30 of this tariff.
- g. Centrex Features - Applicable Centrex features (except for those superseded by Advanced Digital Services counterparts) are available at rates and charges specified in Section 12 of this tariff.
- h. Electronic Key Telephone Service (EKTS) - Electronic Key Telephone Service is a central office based key system implementation that requires no switching equipment on the customer's premise. EKTS requires the customer to provide an EKTS capable terminal set. EKTS provides the customer with the ability to access the following features (where available):
 - 1. Multiple Appearance Directory Numbers - This feature allows a directory number(s) from one EKTS set to appear on the EKTS sets of other users.
 - 2. Additional Call Appearances - This feature allows the same directory number to appear more than once (by assigning the directory number to additional buttons) on a customer's telephone set, allowing the capability of multiple incoming or outgoing calls associated with that directory number. For EKTS users, this feature provides the same functionality as Additional Call Offering (or analog Call Waiting).
 - 3. Analog Line Appearances - This feature allows analog users' directory numbers to appear on an EKTS set, thereby allowing the EKTS user to provide call coverage for analog users. It may limit the use of other features and/or functionalities on analog lines.
 - 4. Bridging - This feature allows more than one EKTS set in the Multiple Appearance Directory Number group to be active on the same call simultaneously.
 - 5. Automatic Bridged Call Exclusion (Privacy on Answer) - This feature allows only one user to answer an incoming call, thereby preventing bridging on incoming calls. On a call by call basis, this feature can be disabled via Privacy (Manual Exclusion) to allow bridging to occur.
 - 6. Privacy (Manual Exclusion) - This feature allows the user to press a feature button which will restrict other stations from bridging onto an existing call that is active at that station or picking up an existing call on hold. A user who has the Automatic Bridged Call Exclusion feature can press the Privacy button to disable Automatic Bridge Call Exclusion and thereby allow bridging to occur on a given call.

7. Intercom Calling - This feature allows for EKTS station-to-station calls. Intercom calls can be made by pressing an intercom button and dialing one or two digits.
8. Display Capability - This feature allows an appropriately equipped telephone set to display a variety of information. For example, when idle, the time and date is displayed. When the user is making a call, call progress information is displayed. The following information is also provided:
 - (a) Caller ID - This feature displays the calling number and name if available. Enhanced Calling Services are available at rates and charges specified in Section 30.3 of this tariff.
 - (b) Called Number Display - This feature displays the called number (dialed digits) on the telephone set when an outgoing call is made.
 - (c) Calling Reason Display - This feature provides a display of the directory number from which a call was redirected (via Call Forwarding features) along with the reason (type of Call Forwarding) for the call being redirected.
9. Feature Function Buttons - This feature gives the user the ability to assign features to specific buttons on the EKTS set. When depressed, the button will activate or deactivate the assigned feature.
10. Ringing Options - This feature is used with Multiple Appearance Directory Number Arrangements and allows the EKTS set to apply different combinations of ringing (ringing is turned off after a specified period of time), delayed ringing (ringing is turned off after a specified period of time), immediate ringing, no ringing, or normal ringing. On a per EKTS user basis, each directory number may have a different ringing option.

DATE OF ORDER:

16. DIGITAL DATA COMMUNICATION SERVICE

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.3 PACKET-SWITCHED DATA SERVICE DESCRIPTIONS

Packet Switching is a service in which packets of data are individually addressed and combined on a transmission path with other addressed packets. Packet-Switched Data Service provides the ability to originate and receive X.25 packet data calls. X.25 is the Consultative Committee on International Telephone and Telegraph's (CCITT) recommended and internationally accepted standard for connecting data terminals to packet-switched networks.

D-Channel Packet - This service provides packet data on the D Channel at a maximum transmission throughput of up to 9.6 kbps per logical channel.

B-Channel Packet - This service provides packet data on the B Channel at a maximum transmission throughput of 64kbps per logical channel.

The customer may choose among the following Packet-Switched features (where available) based upon application needs:

- a. Hunt Groups - An arrangement that allows an incoming call to a busy packet directory number to search through a predetermined list of packet directory numbers in search of a non-busy logical channel to complete the call. The hunting arrangement may be linear or circular.
- b. X.25 Data Services:
 1. Logical Channels - An arrangement that is a virtual circuit, offering multiple logical connections at the packet level of X.25. Logical Channels allow multiple packet calls (or virtual calls) to be active simultaneously on a single D Channel or B Channel.
 2. DTE Support Feature - The Data Terminal Equipment (DTE) Feature allows the network to prevent any network-to-user signaling on a virtual circuit associated with a directory number that is not included in the X.25 version. Virtual circuit communication is allowed between the subscriber's equipment and remote customer equipment that conforms to the X.25 version. This feature is available on a per directory number basis.
 3. RPOA Selection - The Recognized Private Operating Agency (RPOA) arrangement allows the user to specify an Inter-Exchange Carrier or transit network for inter-network calls on a per call basis.
 4. Incoming/Outgoing Calls Barred - This arrangement can either be used to prohibit a data terminal from receiving an incoming call or from originating outgoing calls.

b. X.25 Data Services:

5. Default Information Rate Assignment Features - This arrangement allows the user to subscribe to a default information rate for each direction of communication for a virtual call.
6. Non-Standard Default Packet Sizes Feature - This arrangement allows the user to subscribe to a larger maximum packet size for each direction of communication than the default 128 octets normally provided. To have this arrangement, the user must also have the Flow Control Parameter Negotiation Feature.
7. Flow Control Parameter Negotiation Feature - This arrangement permits the negotiation on a per call basis of the flow control parameters and automatically negotiates the maximum packet size and window size for each direction of data transmission.
8. Throughput Class Negotiation - An arrangement that allows the user to request specific throughput classes (bits/second) in the call request packet for each direction of data transfer associated with a virtual call.
9. Transit Delay Feature - This arrangement allows the user to indicate a desired maximum transit delay in the call request packet on a per call basis.
10. Non-Standard Default Window Size - An arrangement that allows the selection of the default window size of 1 through 7, instead of the standard window size of 2. To have this arrangement, the user must also have the Flow Control Parameter Negotiation Feature.
11. Fast Select - An arrangement that allows a sending data terminal to forward up to 128 bytes of data along with the call setup and clearing packets.
12. Fast Select Acceptance - An arrangement that allows the switch to transmit incoming call packets with the Fast Select facility to a destination terminal that has this feature.

- c. Closed User Groups - An arrangement that limits communications to members within a designated subnetwork of packet switching data users. The Closed User Group feature is established on a per line basis. Each data terminal in a Closed User Group can be arranged in one of the following modes:
1. Closed User Group with Outgoing Access - The data terminal makes outgoing calls only.
 2. Closed User Group with Incoming Access - The data terminal receives incoming calls only.
 3. Incoming Calls Barred Within a Closed User Group - The data terminal makes outgoing calls only to the data terminal in the Closed User Group with which it is associated.
 4. Outgoing Calls Barred Within a Closed User Group - The data terminal receives incoming calls only to the data terminals in the Closed User Group with which it is associated.
 5. Unrestricted Access - The data terminal receives and makes both incoming and outgoing calls.

16.1.4 TECHNICAL SPECIFICATIONS

a. Transmission Specifications

The standard transmission parameters for Advanced Digital Services utilizing an ISDN Basic Rate Interface (BRA) consists of: A maximum of 38.5db loop loss at a 40Kz test tone terminated into a 135 ohm impedance. The 38.5db loss includes all central office facilities, outside plant facilities and inside wiring (which are owned and maintained by the Company only up to and including the demarcation point).

b. Customer Premise Equipment and Facilities

Compatible customer premise equipment is required to utilize ADS. All equipment used to interface with these services is required to conform with NI-1 guidelines.

The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company utilized in the provisioning of ADS render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

16. DIGITAL DATA COMMUNICATION SERVICE

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.5 REGULATIONS

- a. Unless specifically exempted, ADS shall be subject to all general regulations applicable to the provision of service by the Company as stated in this tariff.
- b. ADS is provided at the option of the Company. This service is furnished subject to central office switching capacity, capability, the availability of outside plant facilities, and the necessary billing capabilities.
 1. The availability, functionality, and capabilities of ADS may vary, or may not be available, dependent upon the type of serving central office switch, related software controlling that switch, hardware, and associated outside plant.
 - (a) Where facilities are not available, or unusual expenditures are involved in making them available, the customer may be required to pay additional charges to cover the unusual expenditure, or to contract for services beyond the normal service term, or both. (These rates and charges will be determined on an individual case basis.)
 - (b) Distance Extension Service: ADS may be provided to a customer's location served beyond the normal transmission range of the serving central office. In such cases, in addition to the charges and rates for ADS, Distance Extension Service rates and charges as stated in Section 16.1.6 are applicable.
- c. The minimum charge period for the payment of services provided under this tariff is one month.
- d. At the Company's discretion, the following nonrecurring service connection charges may be reduced or waived during promotional campaigns and/or as a part of customer negotiations:
 1. Nonrecurring per B Channel and/or per D Channel service connection charge.
 2. Nonrecurring EKTS service connection charges.
- e. Directory Listings: One directory listing is provided without charge for each ADS customer. For Centrex customers, one directory listing (either an analog or ADS number) is provided per Centrex system. Additional listings may be provided as specified in Section 32.5 of this tariff.

DATE OF ORDER:

16. DIGITAL DATA COMMUNICATION SERVICE

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.5 REGULATIONS (Continued)

f. Billable Call Treatment

1. Normal toll charges shall apply to calls that are made outside of the Local Service Area.
2. ADS customers who use the Call Forwarding or Call Transfer features are responsible for the payment of any applicable charges for each billable call connected via these features over the public network. The charge is applicable to each call answered, including the Call Forwarding set-up call. It also applies to collect and person-to-person calls, which may be refused at the answering station.

g. Customer Premise Equipment

1. This tariff for ADS does not include terminal equipment on the customer's premises. Terminal equipment may be sold or leased separately by the Company (under a separate contract), or may be provided by the customer.
2. The customer is responsible for providing the power required for any and all customer premise equipment connected to an Advanced Digital Services equipped line.

h. The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failures, or malfunctions of ADS or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.

i. ADS-BRA is not eligible for vacation rates and is not offered for joint use service.

DATE OF ORDER:

16. DIGITAL DATA COMMUNICATION SERVICE

16.1 ADVANCED DIGITAL SERVICES (ADS)
BASIC RATE ACCESS (BRA)

16.1.6 RATES AND CHARGES

a. Advanced Digital Services Access

1. ADS must be ordered in conjunction with basic exchange access services (e.g., R1, B1, Centrex). The rates and charges below are in addition to the existing rates for these services for providing an ADS capable line to the customer's premises. These charges provide a 0B + 0D ISDN service. ADS is available in 1B + D and 2B + D configurations. The customer must select the desired B Channels and D Channel arrangements to configure the service as required. When the Basic Exchange Access Service is ordered at the same time that ADS-BRA is ordered, the service connection charges in Section 16.1.6 of this tariff apply. Charges in Section 27 of this tariff do not apply to ADS-BRA.

<u>Access</u>	<u>Service Connection</u>	<u>Monthly Rate</u>
Residential Advanced Digital Services	\$75.00	\$12.75
Single Line Business Advanced Digital Services	\$125.00	\$12.75
Centrex Advanced Digital Services	\$125.00	\$12.75
Distance Extension Charge	N/A	\$40.95

b. Communications Channels

1. Service establishment and monthly charges:

<u>Service Element</u>	<u>Service Connection</u>	<u>Monthly Rate</u>
Circuit-Switched Voice (per B Channel)	\$10.00	\$3.00
Circuit-Switched Data (per B Channel)	\$10.00	\$3.00
Circuit-Switched Alternate Voice/Data (per B Channel)	\$10.00	\$4.00
High Speed Packet Switched Services (per B Channel)	\$100.00	\$120.00
Low Speed Packet Switched Services (per D Channel)	\$25.00	\$7.50
D Channel Signaling (per D Channel)	N/A	N/A

16 - DIGITAL DATA COMMUNICATION SERVICE

16.2 DIGITAL CHANNEL SERVICE (DCS)

16.2.1 GENERAL

- A. Digital Channel Service (DCS) is an optional packaged service arrangement that is used in conjunction with a customer's business trunks. It packages Private Branch Exchange trunks and DID trunks with a T-1 transmission facility.
- B. DCS facilities provide an intraexchange connection between a customer's premises and the local serving central office. DCS is based on DS1/DS0 technology, also known as T1 service. This service arrangement uses the DS1/DS0 architecture to provide a 1.544Mbps connection. The customer is then provided the capability to transmit voice and/or data over 56Kbps channels of that digital facility. Each DS1 facility provides up to 24 56Kbps (DS0) channels.
- C. Digital Channel Service is only offered on Term Payment Plans of 12, 24, 36, 48 (T) or 60 months.

16.2.2 DCS PACKAGING

- A. DCS service arrangement connects a Telephone Company central office switch to Customer Premises Equipment (CPE). Depending on the application, that CPE might be a PBX, a router, a multiplexer, etc. Each DCS provides up to twenty-four digital communications channels.
- B. Digital Channel Service packages the following components:

Digital Facility - includes the DS1 facility and terminating equipment at each end.

Exchange Services (per channel) - defines how each channel is to be used.

16.2.3 TECHNICAL SPECIFICATIONS

- A. Transmission Specifications - this facility is based on a 1.544 Mbps DS1 carrier (T1 facility) whose characteristics are as follows:

Data Rate = 56 kbps restricted
- B. Customer Premise Equipment and Facilities - compatible customer premise equipment is required for DCS. The Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Telephone Company used in the provisioning of DCS render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

Order No.:
Date of Order:

16 - DIGITAL DATA COMMUNICATION SERVICE

16.2 DIGITAL CHANNEL SERVICE (DCS) (Continued)

16.2.4 REGULATIONS AND CONDITIONS

- A. Unless specifically exempted, DCS shall be subject to all general regulations applicable to the provision of service by the Company as stated in this tariff.
- B. DCS is furnished subject to central office switching capacity, capability, and the availability of outside plant facilities.
- C. Payment for Service
1. The minimum charge period for services provided under this tariff is one year.
 2. Suspension of service is not allowed during the minimum charge period or contract period without penalty.
- D. At the Company's discretion and subject to Commission rule and regulations, nonrecurring charges may be reduced or waived during promotional campaigns (minimum service periods will apply).
- E. Directory Listings - One directory listing is provided without charge for each exchange service. Additional listings may be provided at the rate specified in Section 32 of this tariff.
- F. Customer Premises Equipment
1. This tariff does not include terminal equipment on the customer's premises.
 2. The customer is responsible for providing the power required for any customer premise equipment connected to DCS.
- G. End User Common Line (EUCL) Charges - DCS is subject to Federal Communications Commission (FCC) End User Common Line (EUCL) charges under the rates and application rules specified by the FCC.
- H. The Company shall not be liable for any loss or damages arising out of error, interruptions, defects, failure, or malfunctions of DCS or associated equipment. Damages arising out of such interruptions, defects, failures, or malfunctions of the services after the Company has been notified, and has reasonable time for repair, shall in no event exceed an amount equivalent to the charges made for the service affected for the period following notice from the customer until service is restored.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

JUL 24 1997

PURSUANT TO 807 KAR 5.011,

SECTION 9(1)

ISSUED: June 24, 1997

EFFECTIVE: July 24, 1997

ISSUED BY: President - ALLTEL Kentucky, Inc.
Shepherdsville, KY 40165BY: Jordan C. Neal
FOR THE PUBLIC SERVICE COMMISSIONISSUED BY THE AUTHORITY OF P.S.C.
Order No.:
Date of Order:

16 DIGITAL DATA COMMUNICATION SERVICE

16.2 DIGITAL CHANNEL SERVICE (DCS) (Continued)

16.2.5 RATES AND CHARGES

A.	Digital Channel Service Facility	Service Establishment	Monthly Charge
	Digital Access Facility (per DCS Facility)	\$700.00	\$300.00
	Distance Extension Charge (per repeater)	N/C	\$95.00

B. Channel Services and Term Discounts

For each channel activated, a trunk charge will be applied. The rate for the trunk will be established as a discount of the trunk charge found in Section 25 and/or DID Trunk Charges in Section 31 of this tariff as follows:

	Service Establishment	Monthly Charge
Channel Service(per channel)	\$12.00	N/C
Channel Service Discount (12 Month Service Agreement)	N/C	43% discount of the normal exchange trunk rates
Channel Service Discount (24 Month Service Agreement)	N/C	45% discount of the normal exchange trunk rates
Channel Service Discount (36 Month Service Agreement)	N/C	47% discount of the normal exchange trunk rates
Channel Service Discount (48 Month Service Agreement)	N/C	50% discount of the normal exchange trunk rates
Channel Service Discount (60 Month Service Agreement)	N/C	53% discount of the normal exchange trunk rates

Once a term payment has expired, a new plan must be entered into. If a new plan is not entered into, the trunk rates in Section 25 and/or Section 31.2 will apply without the discounts listed above.

C. Subsequent feature additions and changes

When the above features are ordered or modified after the initial installation of DCS, the nonrecurring Feature Addition and Change charge reflected below is applied in addition to the normal charges reflected in this tariff:

Charge	PUBLIC SERVICE COMMISSION OF KENTUCKY EFFECTIVE
Feature Additions and Changes (per DCS facility)	\$35.00

Only one service charge will apply when multiple features are added or changed on a DCS facility as part of the same service order.

SECRETARY OF THE COMMISSION

16. DIGITAL DATA COMMUNICATION SERVICE

16.3 PRIMARY RATE ACCESS

16.3.1. GENERAL

- A. ISDN architecture provides two access methods that connect customers' premises to network switching systems, Primary Rate Access (PRA) for large quantities of connections and Basic Rate Access (BRA) for smaller numbers of connections. PRA facilities are typically used for business only.
- B. PRA is an optional service arrangement that must be configured with 24 PBX Trunks. This service arrangement uses the ISDN architecture to provide the customer with the capability to transmit voice and data simultaneously over the same digital facility. Under various optional arrangements, PRA provides the customer with access to Circuit Switched Voice Services and Circuit Switched Data Services. In general, this tariff addresses standardized National ISDN-1 (NI-1) capabilities and features.
- C. PRA is offered on Term Payment Plans of 12, 24, 36, 48 or 60 months.

16.3.2. PRIMARY RATE INTERFACE SERVICE ARRANGEMENT

- A. PRA Service Arrangement connects an ISDN-capable Telephone Company central office switch to ISDN-capable Class II Customer Premises Equipment (CPE). Depending on the application, the CPE might be a PBX, a multiplexer, etc. Each PRA service arrangement provides twenty-four or twenty-four digital communications channels.

These communication channels can be either B (Bearer) Channels or D (Delta) Channels:

1. B Channel - The B Channel is a bi-directional synchronous channel capable of supporting digital transmission speeds of 56 kilobits per second (kbps) or 64 kilobits per second, where available. Each B Channel of an Advanced Digital Services PRA may carry:
 - (a) Circuit Switched Voice
 - (b) Circuit Switched Data, or
 2. D Channel - The D Channel is a 56 or 64 kbps digital signaling channel that carries signaling and control for the B Channels.
- B. Primary Rate Access Facility - The Primary Rate Access Facility provides a high-capacity digital link over which the Advanced Digital Services PRA capabilities are delivered. This facility is based on a 1.544 Mbps DS1 carrier (T1 facility). The typical PRA Access Facility configuration is known as 23B+D, where twenty-three of the channels are B Channels and one is a D Channel.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE
MAR 30 1998
PURSUANT TO 807 KAR 5.011,
SECTION 9(1)
BY Sharon S. Bell
SECRETARY OF THE COMMISSION

ISSUED: FEBRUARY 26, 1998

EFFECTIVE: MARCH 30, 1998

ISSUED: Will Staggs
Vice President - State Regulatory
Little Rock, AR 72203

ISSUED BY THE AUTHORITY OF P.S.C.
Order No.:
Date of Order:

16. DIGITAL DATA COMMUNICATION SERVICE

16.3 PRIMARY RATE ACCESS (Cont'd)

16.3.2. PRIMARY RATE INTERFACE SERVICE ARRANGEMENT(Cont'd)

- C. Multiple PRA Facility Arrangement - There may be situations where more than 23 B Channels are needed at a particular customer premise. In those situations, depending on facility availability, multiple PRA facilities can be assigned to an Advanced Digital Services PRA Service Arrangement. With the Multiple PRA Facility Arrangement, the D Channel in the first PRA facility is used to transport signaling for up to four additional PRA facilities. The first facility would be configured as 23B+D and the other facilities would be configured as 24B. This use of Non-Facility Associated Signaling (NFAS) allows the overhead of the D Channel to be distributed over multiple PRI facilities thereby increasing channel efficiency.
- D. D Channel Backup - In Multiple PRA Facility Arrangements, a second D Channel can be assigned (where available) to the primary D Channel to provide redundancy of the signaling channel.
- E. Distance Extension Charge - provides an additional approximately one mile of transmission facility beyond the 12,000 ft provided with the PRA Facility. If a customer is located a great distance from the Company central office, it is possible that several Distance Extension Charges could be required per PRA Facility.

16.3.3. CIRCUIT SWITCHED SERVICE DESCRIPTIONS

Circuit Switching is a switching arrangement in which an entire circuit or B Channel is dedicated to a given call. The circuit is connected on a per-call basis and can carry circuit switched voice or circuit switched data. Circuit switched related services include:

- A. Clear Channel Capability - This feature is a characteristic of the transmission paths on the B Channels that allows the full bandwidth of 64 kbps to be available to the customer. (Clear Channel Capability cannot be guaranteed outside the serving central office. Interoffice traffic may be subrate.) Clear Channel Capability is applicable to CPE that supports clear channel capability.
- B. Dedicated Trunk Groups - The B Channels of PRA can be dedicated for calls to and from the public network. Trunk Group types include Incoming, Outgoing, 2-way, Direct Outward Dialing (DOD) or Direct Inward Dialing (DID).
- C. Primary Rate Call-by-Call Service - The Primary Rate Call-by-Call feature offers access to additional services via the B Channels of PRA. These additional services include:
- Foreign Exchange
 - OutWATS
 - InWATS

16. DIGITAL DATA COMMUNICATION SERVICE

16.3 PRIMARY RATE ACCESS (Cont'd)

16.3.3 CIRCUIT SWITCHED SERVICE DESCRIPTIONS (Cont'd)

With this feature, any B Channel can be used to offer the above services on a per-call basis, in addition to supporting trunk calls to/from the public network (i.e., DOD/DID).

Simulated Facility Groups (SFG) are used to control the number of B Channels that can be used for a particular service or for calls to the public network. The SFG is a logical relationship between the services (or public network calls) and the number of B Channels. Any B Channel may be used for any service (or for public network calls) provided the actual number of calls currently active for that service does not exceed the maximum-allowed value associated within the SFG.

- D. Directory Numbers - Directory numbers may be purchased at rates specified in Section 16.3.6 below.
- E. Caller ID (Number) - This feature allows the central office and the customer's suitably equipped CPE to communicate the calling party's directory number. On calls carried by the PRA, the number can then be made available to be displayed on a properly equipped telephone set or adjunct equipment.
- F. Caller ID (Name) - This feature (where available) allows the central office and the customer's suitably equipped CPE to communicate calling party name information (associated with the calling party's directory number) on calls carried by the PRA. The name can then be made available to be displayed on a properly equipped telephone set or adjunct equipment.

16.3.4. TECHNICAL SPECIFICATIONS

- A. Transmission Specifications - The PRA facility requires a high-capacity digital link over which PRA is delivered. This facility is based on a carrier (T1 facility) whose characteristics are as follows:

- Line Code = Bipolar 8 Zero Substitution (B8ZS)
- Framing Format = Extended Super Frame (ESF)
- Signaling = Common Channel Signaling (CCS)
- Data Rate = 64 kbps clear or 56 kbps restricted
- D Channel = 24th channel on the appropriate PRA access facility

- B. Customer Premises Equipment Facilities - Compatible customer premises equipment is required for PRA. All equipment used with these services is required to conform with National ISDN guidelines, as referenced in the following Bellcore specifications:

16.3 PRIMARY RATE ACCESS (Cont'd)

16.3.4. TECHNICAL SPECIFICATIONS (Cont'd)

B. (Cont'd)

Document Number Description

TR-NWT-001268 ISDN Primary Rate Access Call Control Switching and Signaling Generic Requirements for Class II Equipment

SR-NWT-002343 ISDN Primary Rate Access Generic Guidelines for Customer Premises Equipment

The Telephone Company shall not be responsible if changes in any of the equipment, operations, or procedures of the Company used in the provisioning of PRA render any facilities provided by the customer obsolete or require modification of such equipment or system, or otherwise affect its use or performance.

16.3.5. REGULATIONS AND CONDITIONS

A. Unless specifically exempted, PRA shall be subject to all general regulations applicable to the provision of service by the Telephone Company as stated in this tariff.

B. PRA and its optional services are furnished subject to central office switching capacity, capability, and the availability of outside plant facilities.

1. The availability, functionality, and capabilities of PRA may vary, or may not be available, dependent upon type of serving central office switch, related software controlling that switch, and associated outside plant.

(a) Where facilities are not available, or unusual circumstances are involved in making them available, the customer may be required to pay additional charges to cover the additional expenditure, or to contract for services beyond the normal service term, or both.

2. Alternate Serving Arrangements: Where the customer's serving central office is not PRA capable, the Company, in its discretion, may provide service from an alternate serving central office at no additional charge to the customer. Such provisioning may be selected when, at the discretion of the Company, the service can be provided at a reasonable cost to the Company. The customer must accept the serving location assigned by the Company, and must agree to revert to service from the normal serving central office when PRA is available in that office.

(a) This arrangement may require that the customer accept a directory number change to a number associated with the alternate central office.

PURSUANT TO 807 KAR 5.011,
SECTION 8(1)
BY: Staggs Will
SECRETARY OF THE COMMISSION

16. DIGITAL DATA COMMUNICATION SERVICE

16.3 PRIMARY RATE ACCESS (Cont'd)

16.3.5. REGULATIONS AND CONDITIONS (Cont'd)

B. (Cont'd)

2. Cont'd)

- (b) Calls that are originated by, and terminated to, a customer using this service arrangement will be billed as if the calls were placed from the customer's normal serving central office.
- (c) When PRA subsequently becomes available from the customer's normal serving central office, the customer will be reconnected to the normal serving central office. This may also require a directory number charge. If such changes occur, the nonrecurring charge associated with the change will not be applicable. If the customer does not wish to take service from the normal central office after such service becomes available, but continues to use service from the alternate serving central office, charges for distance extensions (foreign exchange service or special outside facilities) will apply. If foreign exchange service is used, the rates for foreign exchanges will be applied in addition to the PRA rates. Any other special outside plant facilities used to provide PRA will be tarified on an individual case basis.
- (d) The availability, functionality, and capabilities of PRA may vary when a customer's serving central office is equipped to provide such services.
- (e) Situations where the customer specifically requests service from a central office other than its normal serving central office will be handled on an individual case basis.

C. Interconnection with Intermediary Customer

- 1. Where a PRA Service Arrangement interconnects with an Intermediary Customer (e.g., Interexchange Carrier or other service provider) and is resold, the PRA Access is viewed as an interoffice connection.

D. Payment for Service

- 1. The minimum charge period for services provided under this tariff is one year.
- 2. Suspension of service is not allowed during the minimum charge period without penalty. If the customer disconnects PRA prior to the 12, 24, 36, 48 or 60 month service term agreement, the customer will pay a charge equal to the PRA monthly rate in affect on the date of the contract, multiplied by the remaining number of months on the term agreement for each PRA disconnected.

D. (Cont'd)

3. In the event the customer cancels the contract after installation of the required equipment and facilities but before service is established, the customer will pay the applicable installation charges.

- E. Nonrecurring charges may be reduced or waived during promotional campaigns (minimum service periods will apply).

- F. Directory Listings - Directory Listings may be provided as specified for in Section 32 of this Tariff.

G. Billable Call Treatment

1. Normal toll charges (including InWATS and OutWATS charges) shall apply to calls that are made outside the Local Service Area.
2. PRA customers who use the Call Forwarding or Call Transfer features are responsible for the payment of any applicable charges for each billable call connected via these features over the public network. The charge is applicable to each call answered, including the Call Forwarding set-up call. It also applies to collect and person-to-person calls, which may be refused at the answering station.

H. Customer Premise Equipment

1. This tariff does not include terminal equipment on the customer's premises. Terminal equipment may be covered under a separate tariff, sold or leased separately by the Telephone Company (under a separate contract), or may be provided by the customer.
2. The customer is responsible for providing the power required for any customer premises equipment connected to PRA.

18. NUISANCE CALL INVESTIGATION

Nuisance Call Investigation is generally determined to be a public service offering and may be provided, where switching facilities permit, to the public to insure its well-being and safety.

The duration of a nuisance call investigation is generally limited to a 10-day period, but may be extended if deemed necessary to further protect the public's well-being and safety.

The Telephone Company must conform to all local, county, state and federal laws applying to nuisance call investigations, and the delivering of results thereof.

Generally, a nuisance call investigation request must be initiated jointly by the governing law enforcement agency and customer in a document conforming to the local, county, state or federal law. Furthermore, the party requesting such an investigation must orally or in writing express his willingness to prosecute whenever possible.

Results of nuisance call investigations are limited to the identification of the line and not the party originating the call; and, said results will only be submitted to the law enforcement agency originating the request.

Generally, the Telephone Company will make no charge to the party requesting a nuisance call investigation. However, the Telephone Company may apply a charge of \$20.00 for a call requiring an investigation during nights, Sundays, or Holidays, provided only that the investigation could be performed during normal working hours and days; otherwise the charge does not apply.

19. PUBLIC TELEPHONE SERVICE

(N)

The Company provides Access Line Service for the provision of Public Telephone Service to Payphone Services Providers ("PSPs") including the nonregulated operations of the Company.

1. General

- a. Access Line Service for PSP Public Telephone is an exchange line provided at the request of a subscriber for telecommunications use by the general public.
- b. Access Line Service is provided on a flat rate basis.
- c. Access Line Service is provided for use with PSP provided coin or non-coin operated Public Telephones.
- d. Third number and collect calls to Access Line Service for PSP Public Telephones are not allowed.
- e. PSP Public Telephones must be connected to the Company network in compliance with Part 68 of FCC Rules and Regulations.
- f. Access Line Service is provided subject to the condition that all applicable regulations in this Tariff will be adhered to.
- g. Access Line Service is provided for use by the subscriber but may be used by others when so authored by the subscriber, provided that all such usage is subject to the provisions of this Tariff.
- h. Access Line Service is not subject to concessions.
- i. Access Line Service may not be suspended at a reduced rate.
- j. Access Line Service for PSP Public Telephones cannot be included on accounts containing other classes of service. A separate account is required for this offering at each location.
- k. The operator cannot perform coin collecting functions.
- l. The Company is not responsible for refunds of coins deposited in PSP Public Telephones.
- m. PSP Public Telephones may not be attached to other types of access lines.
- n. The subscriber to Access Line Service will be responsible for any and all toll charges billed to the subscriber's account.

1. General (Continued)

- o. PSPs shall post on or near the Public Telephone the name and phone number of the owner of the instrument.
- p. PSPs shall post on or near the Public Telephone the operating instructions for the instrument.
- q. PSPs shall provide and post on or near the instrument a cost-free method for reporting complaints and obtaining refunds.
- r. PSPs that accept coins shall accept coins of various denominations and shall be capable of returning unused coins.
- s. PSPs shall not charge for calls not completed.
- t. PSPs shall provide access to 911 Emergency Service (where available) free and without the use of a coin.
- u. PSP instruments shall be FCC registered, hearing aid compatible, meet federal requirements for size of digits on the instrument, and the use of letterless keypads is prohibited.
- v. PSP Public Telephones shall be mounted in accordance with federal height regulations for disabled persons.
- w. PSPs that provide access to long-distance service shall offer access to all certified long-distance carriers through 1-700, 1-800, 1-950, 10XXX or 101XXX dialing.
- x. PSPs shall offer toll-free access to 800/888 numbers.
- y. PSP Public Telephones shall not be connected behind a PBX.
- z. The multi-line business subscriber line charge, found in the interstate access tariff, is applicable to all Public Telephone access lines.

Order No.:
Date of Order:

19. PUBLIC TELEPHONE SERVICE

(N)

2. Service Options

At the request of the subscriber, certain options may be added to the access line for Public Telephone Service and will be billed at the approved tariff rate. All options must be compatible with the hardware and software in use by the existing telephone Company switching equipment.

a. Coin Supervision Additive Service

The Company will provide Coin Supervision Additive Service to PSPs who order Access Line Service for the provision of Public Telephone Service and where the Public Telephone equipment connected to the Access Line Service requires central office coin supervision capability.

Coin Supervision Additive Service provides the capability of central office line equipment to pass signals and/or tones from the Access Line Service to a trunk terminating at the PSPs operator service provider. These signals enable an operator service provider to recognize coin deposits and return coins to the Public Telephone user. Coin Supervision Additive Service also permits a suitable equipped operator service provider to automatically ring back the originating access line upon completion of a call.

The option requires a special central office line card which differs from the standard access line card and will be provided where facilities exist.

b. Public Telephone Screening/Blocking

Screening/Blocking for Public Telephone access lines includes Company provided services necessary to coordinate with operator connections or block subscribers from making specific types of calls. This service includes software translations done at the Company's facilities and also includes coordination between the Company and connecting Company databases.

20. SHARED TENANT SERVICE OFFERINGS

20.1 General

In general, basic local exchange service is furnished for the exclusive use of the subscriber, and the subscriber's family, guests, employees, agents, or representatives. Resale of basic local exchange service is permitted only under the specific conditions described in this tariff.

The customer must apply in writing to resell exchange services provided by the Company. When in the judgement of the Company it is deemed necessary, the reseller may be required to submit layout maps defining the intended geographic resale area and anticipated development plan in terms of new or existing buildings.

All rates and charges in connection with the resale operation and all repairs and rearrangements behind and including the reseller's communication system will be the responsibility of the reseller (customer of record)/owner. The reseller will be the single point of contact for all shared tenant services provided in the resale service area. Customers who choose to obtain service directly from the Company may subscribe to any local exchange service available.

Nothing in this tariff section impairs the Company's franchise or ability to operate in the state. This tariff is not intended, nor does it, enfranchise or certify the recipients of this service as a telecommunications company.

Resale is permitted where facilities permit and within the confines of specifically identified continuous property areas under the control of a single owner or within a common development with a single name identity, i.e., office parks, shopping centers, apartment complexes, condominiums. Areas designated for resale may be intersected or transversed by public thoroughfares provided that the adjacent property segments created by intersecting or transversing thoroughfares would be continuous in the absence of the thoroughfare. Continuous property may straddle exchange boundaries. In such cases, the most economic serving exchange will be selected.

Little Rock, AR 72203

ISSUED BY THE AUTHORITY OF P.S.C.

Order No:

Date of Order:

20. SHARED TENANT SERVICE OFFERINGS (Continued)

20.1 General (Continued)

The premises definition as applied to resale of basic local exchange service is a resale area as defined by layout maps, if appropriate. See premises as defined in Section 24 of this tariff.

Private line services may be provided to tenants of resellers under the rules and regulations of the private line services tariff.

Private interconnection of resale service areas within an exchange local calling area and LATA is prohibited. Tie Lines are restricted to the private use of a single resale client and cannot be used to access Local Exchange Service via Sharing and Resale trunks or lines.

All other rules and regulations specified in other sections of this tariff will apply.

20.2 Regulations and Application of Rates

Resale of local exchange service is available only on a business flat rate service basis. Regular access line and PBX trunk rates as specified in Section 25 of this tariff shall apply for this service.

The client of the reseller is defined as a different business, firm, corporation, company, subsidiary, association, associate, agent or a residence. One directory listing for each client of the reseller will be provided in the alphabetical section of the directory at no extra charge. Other listings may be obtained under the conditions and rates specified in Section 32, Directory Listings. Client listing charges will not be separately billed.

The service establishment charge shown in 20.3. applies for all resale service applications processed under this tariff and is in addition to all other applicable nonrecurring and recurring charges.

Whether the tenants included in a resale service area are residence or business, such tenants may be served by the reseller and the same business rates specified in this and other tariffs will apply to the reseller.

Order No:
Date of Order:

20. SHARED TENANT SERVICE OFFERINGS (Continued)

20.2 Regulations and Application of Rates (Continued)

The minimum period of service is 36 months with a Service Cancellation Fee (SCF) applicable at the date of termination based on the exchange rates in effect. The Service Cancellation Fee is reduced by 1/36 per month and will be an amount equal to the exchange rates for the maximum number of lines subscribed to during the service period. A nine month notice is required prior to termination of service by the reseller.

When a subscriber located within the designated resale service area wishes to be directly served by the Company on a non-resale basis, or when ALLTEL Kentucky, Inc. or customer provided coin telephone service is to be provided in the resale service area, the reseller will bear the responsibility for and cost of providing premises access for such services. The reseller/owner will make either cable pairs or their equivalents available, or provide facility support (conduit or poles) access to the Company at no charge for provision of these services.

The Company will provide facilities to the first point (demarcation/network interface) inside the reseller's premises which, in the judgement of the Company, is suitable for the location of a network interface. The most economical route from existing network distribution facilities will generally determine the approach used in establishing the point-of-demarcation. The customer may designate an alternate approach route for entrance facilities at additional charges as specified in Section 11 of this tariff. The Company will extend the point-of-demarcation to any point designated by the reseller inside his premises at the charges specified in Section 27 of this tariff. Route selection and location of point-of-demarcation must be in compliance with regulations set forth in other sections of this tariff and F.C.C. Part 68.

All usual and applicable Service Charges and Installation Charges as appropriately indicated in this and other tariffs apply to the activation, move or change of lines within the sharing and resale offering.

Suspension of service as described in Section 14 of this tariff is not applicable to this service.

22. TOLL BLOCKING SERVICE

(T)

1. GENERAL

- a. Toll Blocking will be provided to Residence One-Party and Communications Trunks, and Business One-Party, Key Systems and PBX Trunks. Toll Blocking will not be provided with party-line, Centrex Pay Telephones.
- b. Toll Blocking is offered subject to the availability of suitable facilities and is limited to central offices specifically equipped to provide this service.
- c. The subscriber to Toll Blocking is responsible for Collect, Third Number Billed, Credit Card Calls billed to that telephone number, and any other operator-handled calls.
- d. The Company makes no guarantee and assumes no liability for the accuracy of Toll Blocking. The customer agrees fully and completely to indemnify and save harmless the Company, its successors and assigns, from and against any and every claim, loss, damage, suit or liability arising from the restriction of telephone calls made from the customer's access line.
- e. The minimum contract period for Toll Blocking is one month.

23. LOCAL OPERATOR VERIFICATION AND EMERGENCY INTERRUPT SERVICE

(N)

A. General

Verification and Emergency Interrupt Service is furnished where and to the extent that facilities permit. The customer shall indemnify and save the Company harmless against all claims that may arise from either party to the interrupted call or any person.

1. Verification

- a. The Company furnishes Verification Service for the purpose of aiding subscribers with legitimate call completion problems. Upon request the operator will verify and provide the line status condition of a local subscriber line.
- b. A subscriber originated request for verification of a local number is a chargeable verification request if a Company operator determines that the line is in use. No charge applies if the line is out of order.

2. Emergency Interrupt Service

- a. The Company furnishes Emergency Interrupt Service when a subscriber who has originated a verification request to a line which has been found in a busy talking state informs the operator that an urgent or emergency situation exists and requests that the operator have the busy line cleared.
- b. A subscriber originated request for emergency interrupt to a local number is a chargeable Emergency Interrupt Request.

B. Application of Rates and Charges

1. No charge will apply if the requesting customer identifies that the call is to or from an official public emergency agency. An official public emergency agency is defined as a government agency which is operated by the Federal, State, or local government and has the capability and legal authority to provide prompt and direct aid to the public in emergency situations. Such agencies include the local police, state police, fire department, etc.
2. Charges may not be billed on a collect basis or on a third number basis to the number being verified or interrupted.
3. If the number verified is not in use, or as a result of interrupt the line is cleared, and, at the calling party's request, the operator completed the call, the charges for Operator Assisted Local Calls as defined in this tariff apply in addition to the applicable verification and emergency interrupt charges.
4. ALLTEL Kentucky, Inc. concurs in the Verification and Emergency Interrupt Service rates and charges as filed by BellSouth Telecommunications, Inc. in its General Subscriber Services Tariff and amendments authorized by the Kentucky Public Service Commission.

25. LOCAL EXCHANGE RATES

25.1 Rates for All Classes of Service

This tariff supersedes all tariffs previously issued and no supplement to this tariff will be issued except for the purpose of cancelling this tariff.

This tariff is governed, except as otherwise specified herein, by the General Exchange Tariff, which is hereby made a part of this tariff. Unless otherwise specified, the charges quoted in this tariff or in the General Exchange Tariff are for periods of one month; payable monthly in advance; entitle the customer to exchange telephone service within the exchange area and E.A.S. as specified in Section number 25.2 of this tariff.

Rates for local exchange service include the provision of initial diagnostics required to determine whether a service problem is caused by facilities for which the Company is responsible or facilities for which the customer is responsible. Local exchange service however does not include the provision of actual repairs to facilities for which the customer is responsible, nor does it provide for specific diagnostics regarding the facilities for which the customer is responsible.

25.3 ALLTEL Callers Choice

- a. ALLTEL Callers Choice provides alternate billing for customer dialed station-to-station calls to locations outside a customer's local calling area but within the same LATA. This service is offered on a per line seven digit dialed basis in the exchanges specified in Section 25.3g(2) of this tariff. Customers subscribing to ALLTEL Callers Choice will receive toll free calling.
- b. ALLTEL Callers Choice is offered in the specified exchanges subject to the availability of facilities and billing capabilities.
- c. This service is available to all business and residence customers except as specified herein. Customers who subscribe to multi-party service, Semi-Public Telephone Service, Public Telephone Access Service, or Foreign Exchange Service may not subscribe to this service.
- d. ALLTEL Callers Choice is intended for the personal or business use of the customer and may not be resold to others or used on a planned and continuing basis to intentionally avoid the payment in whole or in part of message toll charges by others.
- e. Appropriate Service Charges apply as specified in Section 27 of this tariff.
- f. The rates for ALLTEL Callers Choice are in addition to rates for exchange service. The charge is assessed on a per line basis except for Centrex which is assessed on a per NAR basis.

25.4 LIFELINE SERVICE

25.4.1 Definition

- A. Lifeline Service is a retail local service offering available to qualifying low-income residential customers who participate in one of the following programs:

Medicaid
Food Stamps
Supplemental Security Income
Federal Public Housing Assistance
Low Income Home Energy Assistance Program

- B. Customers qualifying for Lifeline Service are offered the services or functionalities enumerated in 47 Code of Federal Regulations §54.101 (a) (1)-(8) (relating to Supported Services for Rural, Insular and High Cost Areas).

- C. Lifeline is supported by both the federal and state universal service support mechanisms. The state universal service support mechanism will be funded by the following charge on all customers' bills except Lifeline customers. This amount charged to customers is prescribed by the Kentucky Public Service Commission.

Effective July 1, 2004

Monthly Rate Per Line
\$.08

(1)

25.4.2 Discounts

- A. The following credits will apply for customers deemed eligible for Lifeline assistance:

	<u>Monthly Credit</u>
Federal Subscriber Line Charge Credit	(1)
Initial Federal Credit to Residential Access Line	\$1.75
State Credit to Residential Access Line	\$3.50
Additional Federal Credit to Residential Access Line	\$1.75

- B. The monthly discounted residential rate for qualified low-income customers may not be reduced below zero. Therefore, the credit amount defined in A. above shall not exceed the total of the subscriber line charge and the customer's normal residential local exchange service rate.

25.4.3 General

- A. The Company shall offer toll blocking to all qualifying low income customers at no charge at the time such customers subscribe to Lifeline service. If the customer voluntarily elects to receive toll blocking, the service shall become part of the customer's Lifeline service and all service deposits will be waived.
- B. Lifeline program rate reductions do not apply to long distance service or any other services (i.e., Custom Calling, ALLST*R, construction charges, etc.) which may or may not be tariffed. Customers may obtain such services, where available, at their discretion, although the Lifeline program rate reduction does not apply.
- C. The Lifeline Service rate reductions do not apply to service connection charges, except that customers eligible for Lifeline Service will receive a reduction in applicable service connection charges, as set forth in the Link-Up America Program found in Section 27 of this tariff.
- D. Lifeline program service will not be available on a retro-active basis.
- E. A customer deemed eligible for Lifeline service is automatically eligible for Link-Up Service.

25. LOCAL EXCHANGE RATES (Continued)

25.4 LIFELINE SERVICE (Cont'd)

25.4.4 Eligibility Requirements

- A. The Lifeline program rate reduction shall apply to one (1) telephone line per residential household, at the subscriber's principal place of residence.
- B. The service must be provided in the eligible consumer's name.
- C. The applicant must participate in one of the following programs:
 - Medicaid
 - Food Stamps
 - Supplemental Security Income
 - Federal Public Housing assistance
 - Low Income Home Energy Assistance Program
- D. The customer must sign, under penalty of perjury, a document certifying:
 - 1. He/she is receiving benefits from one of the programs listed in C. above.
 - 2. Name of the program(s) from which they are receiving benefits.
 - 3. That he/she will notify the company if he/she no longer participates in the program(s) named in 1. preceding.

25.4.5 Credits and Deposits

- A. The credit verification procedures available for all applicants who apply for service with the Company will also be used for applicants who apply for service under the Lifeline program.
- B. The deposit standards used for all applicants who apply for service with the Company will also be used for applicants who apply for service under the Lifeline Program with the exception that deposit requirements will be waived for Lifeline Service applicants who voluntarily elect to subscribe to toll blocking service.

25.4.6 Service Charges

- A. Service charges do not apply when eligible customers with existing residential service convert to Lifeline Service.
- B. A service order deposit is not applicable to customers who elect toll blocking when initiating Lifeline service.

25.4 LIFELINE SERVICE (Cont'd)

25.4.6 Service Charges (Cont'd)

C. A service order charge does apply when:

1. At the time Lifeline Service billing is initiated, eligible residential local exchange access service customers also request additional optional calling features such as Custom Calling Features, ALLST*R features, etc.
2. Any subsequent moves or changes after the initial connection to Lifeline service are requested by the customer.
3. Service is established for new residential applicants (those without existing local exchange access service) eligible for Lifeline Service. However, Lifeline customers automatically qualify for service order charge discounts under the Link-Up America Program specified in Section 27 of this tariff.

25.4.7 Payments and Disconnection of Service

- A. Lifeline service may not be disconnected for non-payment of toll charges. In addition, the Company will not deny re-establishment of local service to customers who are eligible for Lifeline Assistance and have previously been disconnected for non-payment of toll charges.
- B. Partial payments that are received from Lifeline customers will first be applied to local service charges and then to any outstanding toll charges.

27. SERVICE CHARGES - CONNECTIONS, MOVES AND CHANGES

27.1 Multi-Element Non-Recurring Charges

Multi-element non-recurring charges are applicable for the following activities resulting from a customer's request.

Service Order Charge (S);
Line Connection Charge (L);

These charges are in addition to all other applicable rates and charges associated with the service being provided.

The charges specified herein do not contemplate work being performed by Company employees at a time when overtime wages apply due to the request of the subscriber, nor do they contemplate work begun being interrupted by the subscriber. If the subscriber requests overtime labor being performed or interrupts work once begun, a charge in addition to the specific charges will be made equal to the additional cost involved.

The "Service Order Charge" (S) applies for work (each service order) done in receiving, recording, and processing information necessary to execute a customer's request for connections of service or moves, changes or additions to existing service.

A "Line Connection Charge" (L) applies to work done in the Central Office and elsewhere in association with providing an access line or making changes thereto. The term "Connection" denotes the establishment of telephone service. A move of existing service to a different premise requires a connection.

A "Premise Visit Charge" applies if an employee visits the customer's premises and completes work requested by the customer.

An "Installation Expedite Charge" applies to specific customer requests to have a complex service installed no less than 24 hours sooner than the normal interval. Complex service is defined in this instance as any service request that installs or relocates 5 or more single party lines, Centrex lines or NARS, and PBX or DID Trunks. Complex services also include any intra or interexchange private line, digital data, 1.544 Mbps or higher circuits, ISDN services, and FX services. Normal interval for installation is generally 10 days for most complex services. However, for 5 or more single party lines, Centrex lines or NARS, and PBX trunks, a normal interval for installation is considered to be 5 days. Installation Expedite Charges will only be applied upon company completion of the expedited installation.

When Company initiated, service charges are not applicable to changes in grade of basic exchange service.

27. SERVICE CHARGES - CONNECTIONS, MOVES AND CHANGES (Continued)

27.2 Application of Charges

A. Service Ordering Charge

Service order activity is classified as either initial (establishment of service) or subsequent (modification to an existing service).

One initial service ordering charge is applicable to each order for establishment of service.

One subsequent service ordering charge is applicable to each order for a move, change, or addition and the following:

Change or addition of additional directory listing.

Change of telephone number.

Only one charge is applicable per order if more than one change is requested on the order.

B. Line Connection Charge

One line connection charge is applicable to the provision of each access line in association with any of the following services:

Individual or Multi-Party Residence Service
Individual or Multi-Party Business Service

Line connection charges are not applicable when service is assumed by a customer prior to discontinuance by another customer (supersedure) and there is no change of telephone number.

A line connection charge is applicable to each change in telephone number made at the request of the customer.

C. Premises visit Charge

One premises visit charge is applicable whenever a Company employee is dispatched to the customer's premises to complete a customer service request.

No premises visit charge is applicable for subsequent visits required to complete an order to which a visit charge has been applied.

The premises visit charge is applicable on a per visit basis.

27.4 Link-Up Kentucky

27.4.1 Definition

- A. Link-Up Service is a retail local service offering available to qualifying low-income residential customers who participate in one of the following programs:

Medicaid
Food Stamps
Supplemental Security Income
Federal Public Housing assistance
Low Income Home Energy assistance program

27.4.2 Discounts

- A. Customers deemed eligible for Link-Up assistance will receive a reduction in the eligible customary service charge for commencing telecommunications service for a single telecommunications connection at the customer's principal place of residence.
- B. The monthly discounted service charge shall be 50% of the customary charge or \$30, whichever is less.
- C. A qualifying low-income customer may receive a deferred schedule for payment of the charges assessed for commencing service, for which the customer does not pay interest. The interest charges not assessed to the customer shall be for connection charges of up to \$200 that are deferred for a period not to exceed one year. Charges assessed for commencing service include any charges that the Company customarily assesses to connect customers to the network. These charges do not include any permissible security deposit requirements.

27.4.3. General

- A. A customer deemed eligible for Lifeline Service is automatically eligible for Link-Up service.
- B. Link-Up Program Service will not be available on a retro-active basis.

27.4.4 Eligibility Requirements

- A. The Link-Up program discount applies to one (1) telephone line per residential household, at the subscriber's principal place of residence.
- B. The service must be provided in the eligible consumer's name.
- C. The applicant must participate in one of the following programs:
- Medicaid
 - Food Stamps
 - Supplemental Security Income
 - Federal Public Housing assistance
 - Low Income Home Energy assistance program
- D. The customer must sign, under penalty of perjury, a document certifying:
1. He/she is receiving benefits from one of the programs listed in C. above.
 2. Name of the program(s) from which they are receiving benefits.
 3. That he/she will notify the company if he/she no longer participates in the program(s) named in 1. preceding.
- E. A qualifying low-income customer shall receive the benefit of the Link-Up program for a second or subsequent time only for a principal place of residence with an address different from the residence address at which the Link-Up assistance was provided previously.

28. MILEAGE CHARGES

28.1 Detached Extension Mileage

Below is the rate for a detached extension, per 1/4 mile or fraction thereof, route mileage measurement for the dedicated facility required to provide the detached extension.

	Monthly Rate
A. Buildings on different premises -	
Minimum of one quarter mile	\$3.00
Each additional quarter mile	.70
B. Between buildings on the same premises -	
Minimum of one quarter mile	3.00
Each additional quarter mile	.70

28.2 Radio Program Channels (Local Loop and I.X.C. portion)

Terms, conditions and rates in the ALLTEL Kentucky, Inc. Intrastate Access Services Tariff apply.

(T)

28.3 Local Loop Rental

The services described and rated in this Section provide a two-wire metallic circuit used only for alarm and metering type circuits. This type of circuit is also known as a dry pair. The design and physical makeup of this two-wire metallic service are neither available nor applicable for Analog or Data service.

(T)

For Voice Grade, Program Audio, narrowband, wideband, Digital Data, high Capacity Private Line Services, or any optional features, conditioning, bridging and multiplexing, rates contained in the ALLTEL Kentucky, Inc. Intrastate Access Service Tariff apply.

It is expressly declared that fully metallic facilities are in continually decreasing supply, and the Company is not obligated to continue to make such facilities available nor to furnish to existing customers.

(T)

The total mileage is the sum of the direct route mileage from each point to its serving central office, with fractional 1/4 miles treated as full 1/4 miles, for each two-point segment of distance.

Date of Order:

30. CALLING FEATURES

30.1 Custom Calling Service

30.1.1 General Regulations

Custom Calling Services are optional telephone service arrangements which provide one or more of the following features:

A. Call Waiting

Alerts a customer who is using his telephone that another caller is trying to reach him. Before a call is initiated the Call Waiting customer may, by dialing a code, activate the cancel feature and Call Waiting is then made inoperative on the first call initiated by the customer immediately following activation of the cancel feature. Call Waiting is restored automatically on termination of the call. During the time the cancel feature is activated, incoming callers receive a busy tone.

B. Call Forwarding

Permits a customer to transfer all incoming calls to another telephone number within the exchange or on the Long Distance Telecommunications Network where facilities permit. The Call Forwarding customer is responsible for the payment of charges for each call between his Call Forwarding equipped telephone and the telephone to which the call is being forwarded. The transmission may vary depending on the distance and routing necessary, therefore, transmission may not meet normal standards.

C. Three Way Calling

Enables a customer to add a third party to an existing call without operator assistance, thereby establishing a three-way conversation. The transmission may vary depending on the distance and routing necessary, therefore, transmission may not meet normal standards.

D. Speed Calling

Enables a customer to place calls to other telephone numbers by dialing a one-digit code rather than the complete telephone number.

E. Warm Line *

Provides for a call to be automatically routed to a predetermined number when the telephone is placed in an offhook condition for a set time interval. During the time interval, the telephone can be used to make regular dialed calls if desired.

Custom Calling Services will be provided in connection with one-party residence and business service. Party line, P(A)BX, and coin telephone services are excluded.

The service will be furnished only at locations where adequate and suitable facilities are available.

* Warm Line is grandfathered and only available to existing customers at existing locations, as of September 11, 2003.

30. CALLING FEATURES (Continued)

30.1 Custom Calling Service

30.1.1 General Regulations (continued)

F. Call Forward Busy Line

This feature provides for calls terminating to a subscriber's busy directory number to be forwarded to either a different subscriber's telephone number or a different telephone number for the same subscriber located on a different premises from the Call Forwarding Busy Line provisioned premises. The customer selected forward-to telephone number is preprogrammed at the time service is established and can only be changed via service order. Call Forwarding Busy Line shall not be used to extend calls on a planned and continuing basis to intentionally avoid the payment of Rotary Line Service.

G. Call Forward Don't Answer

This feature provides for calls terminating to a subscriber's idle directory number to be forwarded, after a customer preselected interval, to another telephone number. The customer selected forward-to telephone number and specified interval are preprogrammed at the time service is established and can only be changed via service order.

H. Disaster Assistance Plan

In the event that a natural disaster occurs in one of the Company's exchanges and destroys or partially destroys customers' premises, the Company may, at its sole discretion, elect to implement a Disaster Assistance Plan. Under the Plan, the Company may, for example, waive the installation fee and up to three months' recurring service charges for Call Forwarding, Call Forward Busy Line, Call Forward Don't Answer, Preferred Call Forwarding, Ring +, and/or other features the Company may deem appropriate. This plan will only be available to residential and business customers whose premises are damaged to the point they are considered unsafe, unsuitable, or uninhabitable. Charges will only be waived with respect to existing local exchange service accounts which are not partially or fully suspended at the time of the offer. Charges will not be waived on service established at a new location.

The Commission will be notified in writing when the Plan is implemented.

30. CALLING FEATURES

30.2 RING+

30.2.1 General

RING+ service will enable a subscriber to have up to four telephone numbers associated with a single line. Customers subscribing to this service will be able to receive calls dialed to two, three or four separate telephone numbers without having additional lines. A distinctive ringing pattern will be provided for each of the additional telephone numbers to facilitate identification of incoming calls. A distinctive Call Waiting tone for each additional telephone number will be provided, where facilities permit, to customers subscribing to Call Waiting service.

RING+ service is offered in the following format. RING+ I consists of one additional telephone number associated with a single line. RING+ II consists of two additional telephone numbers associated with a single line. RING+ III consists of three additional telephone numbers associated with a single line.

30.2.2 Regulators

- a. This service is available to individual line residence and business customers.
- b. The service is not compatible with ALLTEL Digital Centrex (ADC) service, PBX trunk service, intercompany foreign exchange service, or with access lines (T) terminating in customer premises switching or key equipment. RING+ service may not be compatible with all types of customer provided telephone equipment.
- c. RING+ service is provided subject to the availability of facilities. Additionally, RING+ II and RING+ III may not be available in all central offices equipped to provide RING+ I service.
- d. In addition to the rates shown in Section 30.2.3, a directory listing charge is applicable. Listings for RING+ service are subject to regulations specified in Section 32 for directory listings and will be charged for at the regular rate for each additional number subscribed to. Other listings will also be provided under the terms and conditions described in Section 32 of this tariff.
- e. All telephone numbers associated with a line equipped with RING+ service must originate from the same central office switching is activated.
- f. When establishing RING+ service, Call Forwarding service subscribers must choose one of the following options. When Call Forwarding service is activated:
 1. All telephone numbers associated with one line will be forwarded to a single number when Call Forwarding service is activated.
 2. The main telephone number only will be forwarded when Call Forwarding is activated. The additional RING+ numbers will continue to ring and may be answered at the subscriber's option.

30. CALLING FEATURES

30.3 ALLST*R SERVICE

30.3.1 Applications

ALLST*R Service is a group of central office call management features offered in addition to basic telephone service. ALLST*R Service consists of the following features:

30.3.2 Definitions of Feature Offerings

a. Call Return

This feature enables a customer to place a call to the telephone number associated with the most recent call received, whether or not the call was answered or the number is known. When the customer dials a code, the number of the last caller is announced, unless the telephone number of the last incoming call was blocked via per call or per line blocking, or unless the last call was placed from an exchange that is not capable of transmitting the number. The customer can then dial another code to have the network return the call. (C)
(C)
(N)
|
(N)

If the called line is not busy, the call is placed. If the called line is busy, a confirmation announcement is heard, the customer hangs up, and a queuing process begins. For the next 30 minutes, both the calling and the called lines are checked periodically for availability to complete the call. If during this queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone, the call will automatically be placed.

b. Repeat Dialing

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

Repeat Dialing, when activated, automatically redials the last number the customer attempted to call. If the called line is not busy, the call will be placed.

If the called line is busy, a confirmation announcement is heard, the customer hangs up and a queuing process begins. For the next 30 minutes, both the calling and called lines are checked periodically for availability to complete the call. If during the queuing process the called line becomes idle, the customer is notified, via a distinctive ring, that the network is ready to place the call. When the customer picks up the telephone the call will automatically be placed.

JAN 29 1996

PURSUANT TO 807 KAR 5:011,
SECTION 9(1)

BY: Jordan C. Neal
FOR THE PUBLIC SERVICE COMMISSION

Call Tracing

Call Tracing enables the customer to initiate an automatic trace of the last call received.

Upon activation by the customer, the network automatically sends a message to the Company indicating the calling number, the time the call was received, and the time the trace was activated. The customer using this feature would be required to contact the appropriate local law enforcement agency for further action. The customer is not provided the traced number. The results of a trace will be furnished only to legally constituted authorities upon proper request by them.

Only calls from within the same ALLST*R Service capable area are traceable using Call Tracing. This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number in the hunt group, or is Telephone Number identified.

If the customer makes or receives another call after hanging up from the annoying call, prior to activating the trace, Call Tracing will not record the correct number.

30. CUSTOM CALLING SERVICES

30.3 ALLST*R SERVICE (cont'd)

30.3.2 Definitions of Feature Offerings (cont'd)

d. Call Selector

Call Selector provides a distinctive ringing pattern to the subscribing customer for calls received from specific telephone numbers.

The customer creates a screening list of telephone numbers through an interactive dialing sequence. When a call is received from one of the predetermined telephone numbers, the customer is alerted with a distinctive ringing pattern (short, long, short). Calls from telephone numbers not included on the screening list will produce a normal ring. (T)

If the customer subscribes to Call Waiting and a call is received from a telephone number on the Call Selector screening list while the line is in use, the Call Waiting tone will also be distinctive.

When a telephone number on the Call Selector screening list also appears on the Preferred Call Forwarding list, the Preferred Call Forwarding will take precedence. Likewise, when the same number is shown on the Selective Call Rejection list, the call will be blocked.

A customer's line will not produce a distinctive alert if the calling line is not referenced to and originated by the main telephone number or a Telephone Number identified number that represents all the lines in a collection of lines, such as multi-line hunt groups.

e. Preferred Call Forwarding

Preferred Call Forwarding allows the customer to transfer selected calls to another telephone number. A screening list of numbers is created by the customer and placed in the network memory via an interactive dialing sequence. Subsequently, calls are forwarded to the Call Forwarding telephone number only if the calling number can be obtained and is found to match a number on the screening list. (T)

If the customer also subscribes to Selective Call Rejection and same telephone number is entered on both screening lists, the Selective Call Rejection feature must be deactivated to allow the call to forward.

This feature will not work if the calling line is not referenced to and originated by the main telephone number or a Telephone Number identified number that represents all the lines in a collection of lines such as multi-line hunt groups.

ISSUED: January 17, 2003

EFFECTIVE: February 17, 2003

Shepherdsville, KY 40165

ISSUED BY THE AUTHORITY OF P.S.C.
Order No:
Date of Order:

30. CUSTOM CALLING SERVICES

30.3 ALLST*R SERVICE (cont'd)

30.3.2 Definitions of Feature Offerings (cont'd)

f. Selective Call Rejection

This feature provides the customer the ability to prevent incoming calls from specified telephone numbers.

(T)
(T)

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone numbers to be blocked. When a call is placed to the customer's number from a number on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time.

If the customer also subscribes to Preferred Call Forwarding and/or Call Selector and the same telephone numbers appear on those screening lists, Selective Call Rejection will take precedence.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number for the hunt group, or is Telephone Number identified.

g. Selective Call Accept

This feature provides the customer the ability to screen incoming calls against a list of subscriber-specified directory numbers and then accepts any calls only from those specified directory numbers.

(T)

A screening list is created by the customer either by adding the last number associated with the line (incoming or outgoing), or by pre-selecting the telephone numbers to be accepted. When a call is placed to the customer's number from a number not on the screening list, the caller receives an announcement indicating that the party he is attempting to call does not wish to receive calls at this time.

This feature will not work if the incoming call is from a telephone number in a multi-line hunt group, unless the telephone number is the main telephone number for the hunt group, or is Telephone Number identified.

ISSUED: January 17, 2003

EFFECTIVE: February 17, 2003

ISSUED BY THE AUTHORITY OF P.S.C.
Order No:
Date of Order:

30. CUSTOM CALLING SERVICES

30.3.2 ALLST*R SERVICE (cont'd)

30.3.2 Definitions of Feature Offerings (cont'd)

h. Caller ID

This feature enables the customer to view on a display unit the Directory Number (DN) on incoming telephone calls.

When Caller ID is activated on a customer's line, the Directory Numbers of incoming calls are displayed on the called CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability or responsibility with respect to the compatibility of customer's equipment, its performance, or its ability to provide the service.

(T)
|
(T)

If the incoming call is from a caller served by a PBX, only the main number of the PBX is transmitted and available for display.

If the incoming call originates from a multi-line hunt group, the telephone number transmitted will always be the main number of the hunt group.

The delivery of the calling party's name and number is provided by a third party provider. As the information contained in the third party's database may not be up to date and accurate, Kentucky ALLTEL, Inc. shall not be responsible for and makes no representation with respect to the content of the information received or transmitted.

(N)
|
(N)

Caller ID is not available on operator handled calls.

i. Calling Number/Name Delivery Blocking - Permanent

This feature is only available to law enforcement and crisis intervention agencies as described in Section 30.3.3(f). Calling Number/Name Delivery Blocking - Permanent enables the customer to prevent the transmission of their Directory Number and Name on all outgoing calls placed from the customer's line. Calling Number/Name Delivery Blocking - Permanent is in operation on a continuous basis. A service order is required to establish or remove this feature.

If the preassigned access code for Calling Number/Name Delivery Blocking - Per Call is dialed on a line that is provisioned with Calling Number/Name Delivery Blocking - Permanent, the Directory Number and Name may be delivered.

Call Number/Name Delivery Blocking - Permanent is operational on a continuous basis but can be deactivated by the customer by dialing an access code immediately prior to placing a call.

j. Calling Number/Name Delivery Blocking - Per Call

This feature allows a customer to temporarily prevent the transmission of that customer's directory number and name thus control its availability to the called party.

The transmission of the Directory Number and Name can be temporarily prevented on an as needed basis by dialing a preassigned access code prior to making a call. This action must be repeated each time a call is made to prevent the transmission of the Directory Number and Name. Per call blocking is provided free of charge to all customers without subscription in all exchanges in which Caller ID and Caller ID - Deluxe service is to be offered.

Order No.:
Date of Order:

30. CUSTOM CALLING SERVICES

30.3.2 ALLST*R SERVICE (cont'd)

30.3.2 Definitions of Feature Offerings (cont'd)

k. Caller ID - Deluxe

This feature enables the terminating customer to view on a display unit the Directory Name of the calling party in addition to the Directory Number.

When Caller ID - Deluxe is activated on a customer's line, the Directory Name and Number of incoming calls are displayed on the terminating CPE during the first long silent interval of the ringing cycle.

Any customer subscribing to Caller ID - Deluxe will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability or responsibility with respect to the compatibility of customer's equipment, its performance, or its ability to provide the service.

(T)
|
(T)

The Calling Name/Number will not be displayed if the caller is served by a PBX.

The Calling Name/Number will not be displayed if the called party is off-hook.

The Calling Name/Number will be displayed for calls made from another central office only if it is linked by appropriate facilities.

If the incoming call originates from a multi-line hunt group, the Directory Name/Number transmitted will always be the main number's Directory Name/Number.

Calls originating from a public, semi-public or customer-owned pay telephone will always transmit the name information as "Pay-Phone".

The delivery of the calling party's name and number is provided by a third party provider. As the information contained in the third party's database may not be up to date and accurate, ALLTEL Kentucky, Inc. shall not be responsible for and makes no representation with respect to the content of the information received or transmitted.

(N)
|
(N)

l. Anonymous Call Rejection

Anonymous Call Rejection allows customers to automatically reject all calls that have been marked anonymous (activated CPN blocking) by the calling party. When Anonymous Call Rejection is active, the called party receives no alerting (ringing) for a call that has been rejected. The call is routed to a denial announcement and subsequently terminated.

13. Caller ID on Call Waiting

This feature enables the customer to view on a display unit, the calling party Directory Number or Directory Name and Number on incoming telephone calls when the subscriber's line is in use. The date and time of the call is also transmitted to the customer. A maximum of 15 characters is allowed for the transmission of the calling party Directory Name.

When the Caller ID on Call Waiting customer's line is in use, the Directory Number or Directory Name and Number of the line that originated the incoming call and the date and time of the call will be displayed on the called CPE following the waiting call alerting tone. The called party has the following options for disposition of the incoming call:

- Answer the waiting call while placing the original call on hold,
- Alternate between the waiting call and the original call, and
- Ignore the call

Customers subscribing to Caller ID on Call Waiting must also subscribe to Call Waiting, and either Caller ID or Caller ID Deluxe. When subscribing to Caller ID on Call Waiting along with Caller ID, customers will be able to view the calling party Directory Number on incoming calls when the subscriber's line is in use. When subscribing to Caller ID on Call Waiting along with Caller ID Deluxe, customers will be able to view the calling party Directory Name and Number on incoming calls when the subscriber's line is in use.

Any customer subscribing to Caller ID on Call Waiting will be responsible for the provision of a display device which will be located on the customer's premises. The installation, repair, and technical capability of that equipment to function in conjunction with the feature specified herein will be the responsibility of the customer. The Company assumes no liability and will be held harmless for any incompatibility of this equipment to perform satisfactorily with the network features described herein.

30.3. ALLST*R SERVICE (cont'd)

30.3.3 Regulations and Limitations of Service

The following limitations apply:

- a. ALLST*R Service is provided subject to the availability of facilities. Additionally, the features described will only operate on calls originating and terminating within ALLST*R service equipped offices, or similarly equipped offices of interconnecting Local Exchange Companies. Also, feature screening lists can only contain telephone numbers of subscribers served out of ALLST*R Service capable offices.
- b. The service is available to all single party customers who have rotary dial or Tel-Touch service.
- c. The service will not work on an originating basis with party-line service, Toll Terminals or some Remote Switching Locations.
- d. The appropriate service order charge as indicated in Section 27.3 applies. (N)
- e. The Company will deliver all numbers and names, subject to technical limitations, including telephone numbers associated with Non-Published Listing Service as described in Section 32.1 of this tariff.
- f. Calling Number/Name Delivery Blocking - Permanent is only available to law enforcement and crisis intervention agencies, at no charge, as follows:
 1. The agency should establish that its business is law enforcement or one which the divulgence of identities over the telephone could cause serious personal or physical harm to its employees or clients, such as a domestic violence intervention agency and;
 2. The agency should establish that the forwarding of numbers and names through Caller ID and Caller ID - Deluxe would seriously impair or prevent it from performing its business and;
 3. The agency should establish that no reasonable offering by the Company, other than blocking, will protect its desired anonymity.The head of the agency must submit written certification on official letterhead to local Company management citing the need for blocking when the aforementioned conditions are met. The Company's limits of liability are described in Section 2.2 of this Tariff.
- g. Telephone numbers and names transmitted via Caller ID and Caller ID - Deluxe are intended solely for the use of the Caller ID and Caller ID - Deluxe subscriber. Resale of this information is prohibited.
- h. Caller ID, Caller ID - Deluxe and Call Tracing are not available on operator handled calls.

30. CALLING FEATURES

30.4 Remote Call Forwarding Service

a. General

Remote Call Forwarding (RCF) is a local exchange service that utilizes a telephone number that is forwarded automatically by the Company's central office equipment to the terminating central office line in the same exchange or a different exchange.

PUBLIC SERVICE COMMISSION
OF KENTUCKY
EFFECTIVE

NOV 15 1996

b. Regulations

- (1) RCF service is offered in central offices where facilities permit.
- (2) RCF service is a central office service that, if the customer desires that the terminating number be changed, requires the Company to make number changes.
- (3) Remote Call Forwarding is not offered where the terminating number is a coin telephone.
- (4) Identification of the originating telephone number is not provided to the Remote Call Forwarding customer.
- (5) Since the grade of transmission on calls which are remote call forwarded may vary, depending upon the location of the calling party in relation to the terminating station, the Company cannot guarantee transmission on forwarded calls.
- (6) Remote Call Forwarding is not represented as suitable for the transmission of data.
- (7) The central office line on which the remote call terminates may not be equipped with call forwarding or RCF.
- (8) RCF is provided on condition that the customer subscribe to sufficient RCF paths and terminating facilities to adequately handle calls to the RCF customer without interfering with or impairing any other services offered by the Telephone Company. In the event that the use of RCF causes impairment, disruption or deterioration, the Company shall have the right to discontinue such service without prior notification to the customer.
- (9) The minimum charge for the RCF service is the applicable one-party business rate for one month plus the Service Connection Charge.
- (10) Charges for the call to the RCF originating directory number shall be paid by the calling party.
- (11) Each RCF is entitled to one alphabetical and one classified listing at no additional charge in the directory which serves the associated RCF central offices. (Overflow paths associated with foreign exchange trunk groups are not listed.) All other listing regulations for business individual lines apply, except that no charge applies for non-published service in connection with RCF. Additional listings may be obtained as described in Section 5 of this tariff.
- (12) Installation, changes, and reprogramming of the Central Office forwarding phone numbers will be performed by the Telephone Company per customer service order request and will be charged the appropriate service charges per Section 27 of this tariff.

Date of Order:

30. CALLING FEATURES

30.4 Remote Call Forwarding Service (cont'd)

c. Rates

	Monthly Rate	Service Connection Charges
(1) Remote Call Forwarding, each path	Applicable One Party Business Rate (See Section 25)	Service Order and C. O. Charge (See Sec. 27)
(2) Rearrangement and Changes		
(a) Change of telephone number to which calls are forwarded, per occasion		Service Order and C.O. Charge (See Section 27)
(b) Change of directory listing, per occasion		Service Order Charge (See Sec. 27)

- (3) In addition, the subscriber to Remote Call Forwarding is responsible for dial type (DDD) station-to-station local and toll charges applicable to calls transferred from the forwarding location to the terminating location. The charge applies for each call answered, including person-to-person and collect calls which are refused at the terminating location.

The portion of the call from the originating station to the call forwarding location will be billed to the originating station based upon the regularly applicable tariff charge for the type of call involved.

30. CALLING FEATURES

30.5 Custom Calling Local Area Signaling Service - Per Use

30.5.1 General

- A. The services listed below are offered on a per usage basis to residence and business customers in exchanges with equipped properly central offices and are subject to the limitations for each service in Section 30 of this tariff. If customers subscribe to these services on a monthly basis as described and rated in other subsections of this section of the tariff, unlimited access is provided with no additional charge for each activation. If facilities permit, the features listed below may be utilized on a non-subscription basis with a per use charge for each activation.
- B. Custom Calling Local Area Signaling Service - Per Use will be offered free of charge for up to thirty days after facilities, which allow these services to be offered, are added.
- C. Blocking of Per Use Custom Calling Services is offered to customers at no charge. This blocking option, once activated, does not allow Per Use Custom Calling Services to be activated on a line.
- D. The services listed below are being offered with a cap on the total charge for any one Per Use Custom Calling Service per line for one billing month, with the exception of Call Tracing Service.

30.5.2 Rates

<u>Per Use Features</u>	<u>Per Use Rate</u>	<u>Maximum Monthly Per Use Charge</u>
Call Return	\$0.75	\$6.00
Repeat Dialing	0.75	6.00
Three Way Calling	0.75	6.00
Call Forwarding	0.75	6.00
